••• Values & Spending •••

Directions: Listed below are categories for things you can buy (for example, spending money on pizza is a "Food" purchase). Rank them from least to most important. Feel free to invent your own categories, too.

_____ Food

_____ Transportation

_____ Internet/Cable/Cell Phone

_____ Clothing

_____ Entertainment/Leisure

_____ Saving for the Future

_____ Housing/Rent

Next, think of everything you've purchased in the past month. Write down everything you bought and approximately how much it cost (take your best guess if you can't remember).

Total spent: _____

Finally, calculate what percent of your income you spent in each category. Draw a pie graph reflecting your percents.

Total Spent on Food: _____, **Percent:** _____
Total Spent on Transportation _____, **Percent:** _____

Total Spent on Internet/Cable/Cell: _____, **Percent:** _____

Total Spent on Clothing: _____, **Percent:** _____

Total Spent on Entertainment/Leisure: _____, **Percent:** _____

Total Spent on Saving: _____, **Percent:** _____

Total Spent on Housing/Rent: _____, **Percent:** _____

Does the way you actually spend your money reflect the values you ranked at the top? Why or why not?
