

THE STOCK MARKET GAME™

Grade 8 Standards

Economics

In SMG...

- Students research companies by reading graphs comparing costs over time and analyzing whether or not the stock is a good purchase.

Students will:

- Make informed economic choices by identifying goals, interpreting and applying data, and revising goals based on analysis.

Strands

8.2.1.1.1

Relationships and Functions

In SMG...

- Students use equations, charts, and graphs to solve basic savings and investment problems.

Students will:

- Represent arithmetic sequences using equations, tables, graphs and verbal descriptions, and use them to solve problems.

Strands

8.2.2.4

Science

In SMG...

- Students research companies and learn how advances in technology in the companies' products affect their success or failure.

Students will:

- Provide examples of how advances in technology have impacted how people live, work, and interact.

Strand

8.1.3.3.3

English and Language Arts

In SMG...

- Students research companies by reading news articles, and use evidence within the articles to determine if they will invest.
- Students use multiple sources when gathering information on potential investments.

Students will:

- Cite textual evidence that most strongly supports an analysis of what the text says explicitly, as well as inferences from the text.
- Gather relevant information from multiple print and digital sources.

Strands

8.5.1.1
8.7.8.8
